# Shushanik Arakelyan, Front End Developer

Yerevan, Armenia, 041818591, shushanikarakelyan38@gmail.com

## Summary

Results-driven Frontend Developer with 1+ year of expertise in React and JavaScript, currently delivering high-impact web solutions at N2G Brains. Previously gained full-stack and cloud engineering experience during an intensive internship at EPAM.

Certified in AWS Serverless, OutSystems Frontend Development, and Contentstack, demonstrating a strong foundation in modern development tools and cloud technologies. Proven ability to build scalable, user-focused applications while continuously expanding technical capabilities.

## Work Experience

Jan 2023 - Jan 2024 FinnLaw

Provided comprehensive legal support including document preparation, case research, and administrative assistance. Performed legal, jurisdictional, and judicial translations, ensuring accuracy and adherence to legal terminology. Assisted in court and investigative proceedings by delivering precise translation services and maintaining confidentiality of sensitive information.

Jan 2024 - Apr 2026 INGO Armenia Insurance company

Reviewed and processed medical insurance claims, evaluating documentation for accuracy and compliance with policy terms. Collaborated with healthcare providers and clients to verify medical information and resolve claim-related inquiries. Maintained detailed records of medical cases, ensuring proper documentation and adherence to regulatory standards while providing timely support to policyholders.

May 2025 - Jan 2026 N2G Brains

Developed and maintained responsive web applications using React and JavaScript, ensuring optimal user experience across devices. Collaborated with cross-functional teams to translate design mockups into functional, high-performance interfaces. Implemented reusable components, optimized code for performance, and participated in code reviews to maintain code quality standards. Worked with modern development tools and version control systems to deliver scalable solutions.

Nov 2025 - Present EPAM

**Full Stack & Cloud Engineering Intern**

An intensive internship working on real-world client projects. Developed full-stack applications using modern JavaScript frameworks and implemented cloud solutions with AWS serverless technologies including Lambda, API Gateway, and DynamoDB. Built RESTful APIs, integrated frontend components, and deployed scalable cloud infrastructure. Participated in agile development cycles, code reviews, and collaborated directly with senior engineers to deliver production-ready solutions.

## Education

Sep 2019 - May 2023 Bachelor's degree, Yerevan State University

Graduated with honors (Red Diploma), demonstrating consistent academic excellence throughout the program. Developed strong analytical and critical thinking skills while maintaining top academic performance across all coursework.

Sep 2023 - May 2025 Master's Degree, Yerevan State University

Completed with honors (Red Diploma), maintaining outstanding academic performance and achieving top-tier results. Advanced research and problem-solving capabilities through rigorous academic challenges and independent study.

## Languages

| | | | |
|---|---|---|---|
| English (C1) | Fluent | Armenian | Native Speaker |
| Russian (B2) | Basic | Persian (C2) | Very Good |

## Skills

| | | | |
|---|---|---|---|
| HTML/CSS | AWS | Jest | Adaptability |
| JavaScript | AJAX | MongoDB | Communication |
| React.js | Chrome DevTools | OAuth2 | Managing Teamwork |
| TypeScript | Node.js | React Router | Problem-solving |
| Material UI | Express.js | Serverless | Self-awareness |
| Lodash | Git | Thunder Client | Time Management |
| Axios | GitHub | Postman | Fast learner |

## Projects

Feb - Present

Vet Clinic Application

Developing the frontend for a comprehensive veterinary clinic management system designed to automate and streamline operations across the clinic network. Building responsive user interfaces with React to manage patient records, appointments, inventory, and client communications. Implementing intuitive dashboards and workflows to enhance efficiency for veterinary staff and improve the overall client experience.

Nov 2025 - Jan 2026

Insurance Company Web Application

Developed a modern, responsive insurance company website using React and Material UI, featuring intuitive navigation and seamless user experience. Implemented multi-page architecture with React Router for smooth client-side routing and component-based design for scalability and maintainability.

Oct 2025 - Nov 2025

Movie Discovery Platform | React Web Application

A dynamic, feature-rich movie discovery web application built with React, enabling users to browse, search, and explore comprehensive movie information. Integrated with The Movie Database (TMDb) API to deliver real-time data including trending lms, detailed movie information, cast details, and user ratings.

Aug 2025 - Sep 2025

Nike E-Commerce Platform | Responsive Shopping Web Application

A modern, fully-responsive e-commerce web application showcasing Nike footwear collection with complete shopping functionality. Features dynamic product catalog, interactive product customization (colors, sizes), and seamless checkout process, delivering a premium online shopping experience across all devices.

Jun 2025 - Aug 2025

Weather Forecast Application | Real-Time Weather Data Platform

Integrated with OpenWeatherMap API to deliver accurate, up-to-date meteorological data including current conditions, hourly forecasts, and extended predictions with an intuitive, visually appealing interface.

## Certificates

Jan 2026 - Feb 2026 AWS knowledge based serverless training

Feb 2026 Contentstack Certification

Nov 2025 - Dec 2025 OutSystems Frontend Development Certification
